

welltodrill

di Valentina Gagliardi

Welltodrill di Valentina Gagliardi

was founded in 2011 to offer oil & gas companies **well-related advice at every stage of the well delivery process, from high level concept definition and cost estimates, to detailed drilling / completion / abandonment designs and AFEs. Seismics interpretation and pressures' definition** are also provided.

Once a contract has been obtained, Welltodrill di Valentina Gagliardi effectively **becomes the client's well engineering department** and works closely with the client's subsurface and management team, **assisting them in defining well objectives and subsurface constraints and designing the well based on a structured delivery process and internationally recognized well integrity standards.**

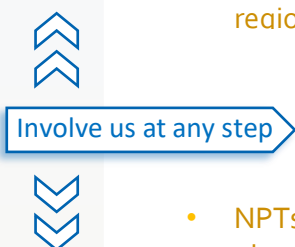

Times and Costs are modelled using the Welltodrill Engine, providing **transparent, structured and tailored cost focus and control.**

Welltodrill di Valentina Gagliardi has **Europe** as its main area of focus including drilling, completion and abandonment of land and offshore projects in **Italy**.

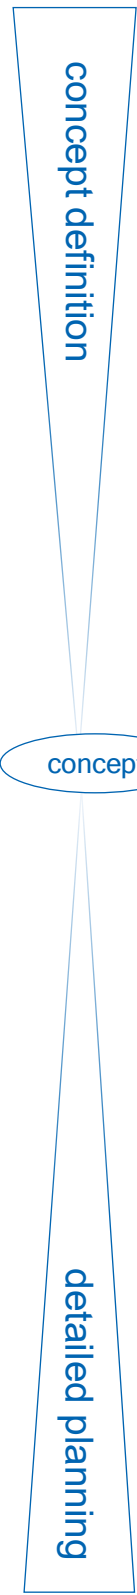

economic
times and costs

technical
planning and execution

- Seismics interpretation
- Well objectives definition and optimized data acquisition requirements
- High level trajectory and well distribution optimization
- Feasibility assurance and (new) technology identification
- Assessment of major project risks
- Average NPTs from vast regional experience
 - Preliminary pressures determination
 - High level drilling / abandonment program / review
- NPTs based on offsets, planned strategy and risk
 - High level completion program / review
- Average timings from regional or geological offsets
- Average regional cost of materials and service rates
 - Detailed pressures determination
 - Detailed trajectory and well design
 - Detailed well drilling / abandonm. program / review
 - Detailed Completion programme / review
- Detailed timings based on offsets, planned strategy and risk register
 - Review of Well Control & Blow out Prevention & Contingency
 - Drilling Rig and Drilling Equipment Assessment
 - Review of drilling procedures
- Materials and services procurement, preparation of AFE
 - Drilling Data Management
 - Well Engineering Management
 - Drilling Supervision

Well Integrity, Well Barriers, Risk Register, HSEEO

ONE TIME & COST ENGINE

INCREASING DETAIL, CONCEPT TO AFE

Welltodrill di Valentina Gagliardi **is centered on delivering wells**, and therefore the coordinator of each project is Valentina Gagliardi, a Senior Well Engineer with more than 15 years' experience in the design and execution of land and offshore wells with major oil & gas companies.

A few consultants work with Valentina Gagliardi at delivering well projects, each very experienced in their own discipline, and are involved when aspects of subsurface interpretation, completion, metallurgy and permits require specific attention.

These consultants were chosen based on:

- **Previous successful working collaboration** and friendship on a personal level with Valentina Gagliardi, which ensures positive, trustful and enjoyable team work and therefore better results;
- **More than 15 years' experience in their discipline**;
- **More than 10 years' experience working abroad with major international companies**, warranting an international approach to the project, free of local preconceptions which may sometimes limit creative thinking;
- **More than 5 years' experience working in the Italian environment**, and therefore knowledge of the local know-how and contacts within service companies;
- **Ability to travel** and meet the clients at their offices upon request;
- **Fluent spoken and written English and Italian**.
